GDI Hub
Accelerate

A powerhouse of insight, innovation and technical excellence – we design, test, and scale solutions.

Insights Hub

An accessible collection point for leading-edge research, data, evidence and insight.

By harnessing data and plugging into macro shifts and promising ideas, we can build on the sparks of innovation to accelerate change - helping guide ventures to success.

Venture studio

Global programmes to nurture the next generation of Assistive Tech (AT) pioneers - supporting products to scale.

By lowering the barriers to participation, we create a safe space for ventures and start-ups to rapidly explore new concepts and business models to create market-ready products.

Bespoke consultancy

Working with business, governments and multilateral organisations to deliver global AT solutions across ecosystems.

By unlocking new innovation pathways, we overcome wicked problems - tackling product and market-based challenges to maximise impact— testing solutions and convening the global AT community.

Brave, creative and human

Seeking Global Solutions

► For new ideas. A starting point....

The insights hub provides the foundations for start-ups, businesses, entrepreneurs, researchers and policy makers to explore global knowledge, data and evidence — the first step in any development journey.

► For ventures. A path....

The venture studio has resources and tools, alongside our proven AT accelerators; Innovate Now (Africa first AT accelerator bringing start-ups to market), and the Assistive Tech Impact Fund (providing grant capital alongside venture building to scale tested solutions in new markets). Complete our innovator enquiry form to tell us about your product and the help you require. We'll let you know about our upcoming programme opportunities and help open doors.

► For rapid scaling. An acceleration....

Our bespoke services provide the knowledge and expertise to create impact. Working directly with organisations and business, we'll use our expertise across research, design, development, manufacturing and supply chains to take products and ideas to national and global markets.

Brave, creative and human

► Expertise

Our team bring unique experience from the world of research, tech, innovation and product development. We are at the forefront of Assistive Tech, Inclusive Design, ICT, HCI globally.

Ecosystems growth

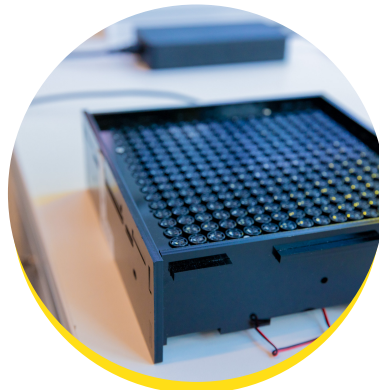

Navigating new markets

Examples

»»» Innovator map

The AT map is the first-of-its-kind visualisation of key innovators and stakeholders in the AT and disability innovation ecosystem across emerging markets.

»»» Tactile Display

Pushing the boundaries of tactile display technologies by designing a new way to produce erasable tactile drawings and graphics to present and create visualisations.

»»» Wheelchairs

Tackling the wheelchair shortage in Africa by testing the technical and economic viability of manufacturing at scale in low-and middle-income countries.
